Ohio Weather Notes

(continued from page 3)

Zanesville 6N #48 (Muskingum County) Thomas Ruggles - Wet and mild describes February of 2018. While not as warm as las February, temperatures averaged about 6 degrees above normal. A high temperature of 80 degrees on the 20th was recorded. Has there ever been an 80 degree temperature in February?! Precipitation occurred on 15 days, and the total was over 4 inches above normal. ■

In answer to your question (has there ever been an 80 degree temperature in February?), the answer is NO! According to the National Weather Service, Feb. 20, 2018, is the “hottest National Weather Service-recorded February day in Ohio history.” And, **officially**, the highest NWS temperature that day was just 79 degrees at Cincinnati.
