Storms & Drought of 1991

(continued from page 6)

A stationary thunderstorm from the 19th-20th of August, 1991 dumped between 10 and 12 inches of rain on Port Clinton (Ottawa County) in 11 hours. Basements were flooded, and some people had to be evacuated.

As a rule, however, rainfall that August was below normal across much of Ohio. This put some parts of the state in the severe to extreme drought category of the Palmer Drought Severity Index, resulting in crop failure. ■
